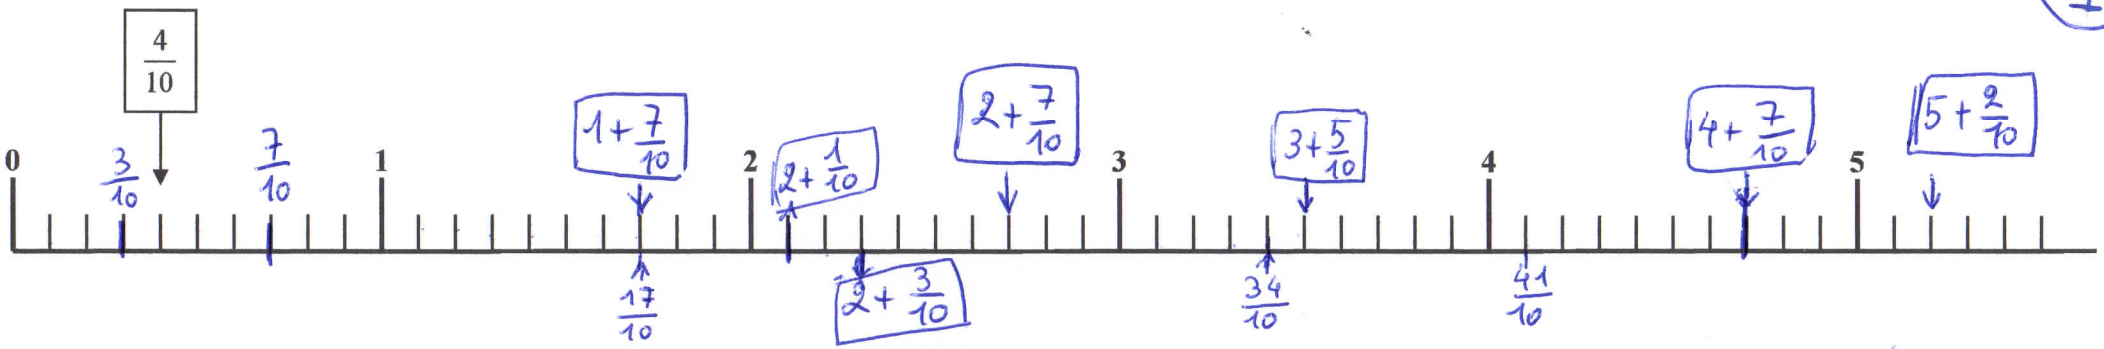
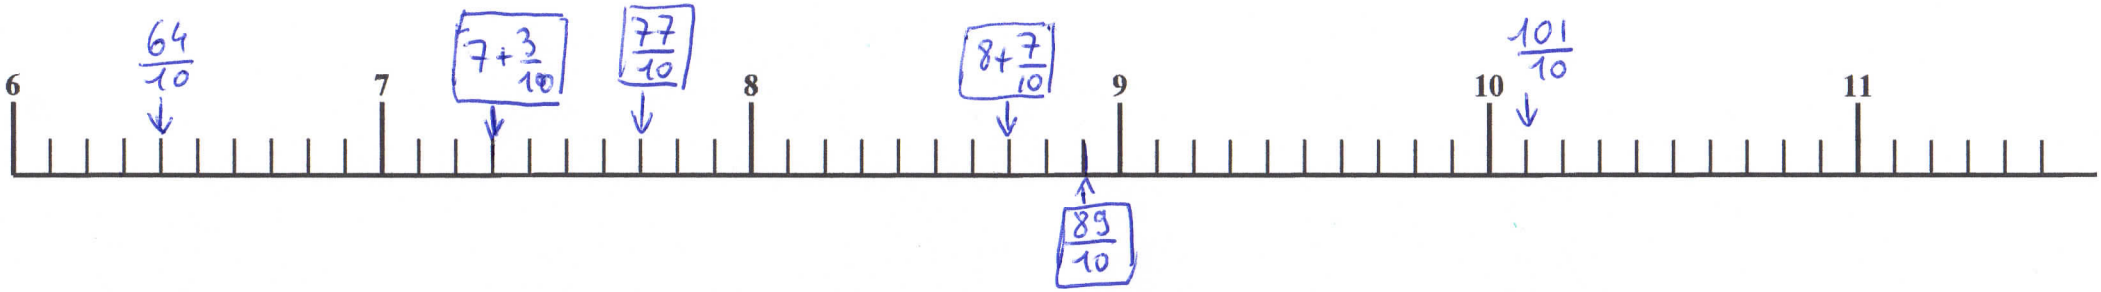
FDT

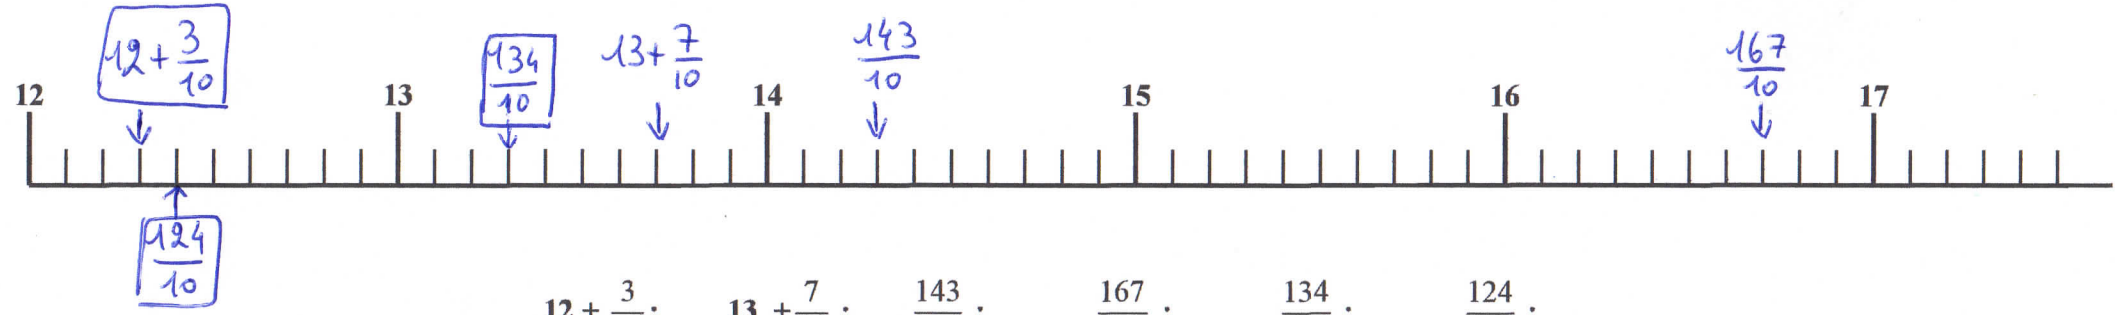
Placer des fractions décimales (dixièmes) sur la droite graduée



$\frac{3}{10}$; $\frac{7}{10}$; $2+\frac{1}{10}$; $4+\frac{7}{10}$; $2+\frac{3}{10}$; $3+\frac{5}{10}$; $1+\frac{7}{10}$; $2+\frac{7}{10}$; $5+\frac{2}{10}$; $\frac{17}{10}$; $\frac{34}{10}$; $\frac{41}{10}$; ~~$\frac{41}{10}$~~ ;



$7+\frac{3}{10}$; $8+\frac{7}{10}$; $\frac{77}{10}$; $\frac{64}{10}$; $\frac{101}{10}$; $\frac{89}{10}$;



$12+\frac{3}{10}$; $13+\frac{7}{10}$; $\frac{143}{10}$; $\frac{167}{10}$; $\frac{134}{10}$; $\frac{124}{10}$;

Et on retient bien que $\frac{124}{10} = 12 + \frac{4}{10}$ ou $\frac{89}{10} = 8 + \frac{9}{10}$
