

Écris les égalités, comme dans l'exemple.

$$\frac{27}{10} = 2 + \frac{7}{10}$$

$$\frac{31}{10} = 3 + \frac{1}{10}$$

$$\frac{194}{100} = 1 + \frac{94}{100}$$

$$\frac{208}{100} = 2 + \frac{8}{100}$$

2 Décompose le saut de Plouf, comme dans l'exemple.

$$\frac{19}{10} = 1 + \frac{9}{10}$$

$$\frac{14}{10} = 1 + \frac{4}{10}$$

$$\frac{25}{10} = 2 + \frac{5}{10}$$

3 Décompose les fractions, comme dans l'exemple.

$$\frac{49}{10} = \frac{40}{10} + \frac{9}{10} = 4 + \frac{9}{10}$$

$$\frac{345}{100} = 3 + \frac{4}{10} + \frac{5}{100}$$

$$\frac{57}{10} = \frac{50}{10} + \frac{7}{10} = 5 + \frac{7}{10}$$

$$\frac{784}{100} = \frac{700}{100} + \frac{80}{100} + \frac{4}{100} = 7 + \frac{8}{10} + \frac{4}{100}$$

$$\frac{81}{10} = \frac{80}{10} + \frac{1}{10} = 8 + \frac{1}{10}$$

$$\frac{654}{100} = \frac{600}{100} + \frac{50}{100} + \frac{4}{100} = 6 + \frac{5}{10} + \frac{4}{100}$$

Attention : Unités dixièmes centièmes
